Data Structures

EMPLOYMENT HISTORY

Cerner Healthcare Solutions (Karnataka,India)

Jun 2017 - Apr 2020

System Engineer

Worked as a Full Stack Developer in Soarian Financials Team which delivers a Claims application that aids Insurance claim process for the patients visiting the hospitals.

- Owned and developed major enhancements and defects across 3 different systems.
- Leveraged communication skills to contribute to a weekly newsletter released to the entire company each quarter.
- Rebuilt two frontend systems using React and Javascript, resulting in a 20% improvement to user satisfaction scores.
- Developed scripts to automate repetitive tasks that were adopted by over 30 team members, saving more than 20 minutes of manual effort or about 10 hours of labor each month.
- Worked with project managers, developers, quality assurance and customers to resolve more than 25 technical issues.
- Received a NOTT Award in Dec 2018. It is awarded when an associate goes above and beyond by achieving exemplary results on a project, either by stepping up to the plate and coordinating a project or handling extraordinary issues with a professional attitude.

Software Intern

- Understood the challenges in the healthcare industry by working closely with different teams and different solutions offered by Cerner Healthcare.
- Designed and developed a 'Package Tracking tool' which displays the build and package details of all the domains when a particular client is selected. This tool hosts details of more than a 100 clients.
- Designed and developed operating processes for converting and refining raw materials into products.
- Collaborated with developers and performance engineers to enhance more than 15 defects.
- Received a STAR Award in March 2017. The S.T.A.R. (Special Thanks and Recognition) Award program is awarded to associates who go above and beyond throughout the quarter.

PERSONAL PROJECTS

- Food Recommendation : <https://gowthami.live/Food-recommendation/>

This responsive website is created using HTML, CSS and Javascript. When a city name is entered, it uses Zomato API to fetch a famous food collection of that particular city and displays them accordingly.

- Bitcoin price: <https://gowthami.live/Bitcoin-price/>

Using highcharts in javascript and a bitcoin price API, a graph is created to compare the price of bitcoin in USD, GBP, EUR. The graph is updated after every 3 seconds with the current time and price.

- To-do list: <https://gowthami.live/To-do-list/>

A to-do list is created where we can add the tasks for the day. Completed tasks can be checked and deleted.
